

POWER TEAM PROTECTIVE BLANKET

Our blankets are designed to contain broken or flying parts from the most extreme forces, thus resulting in a much safer work environment.

TESTING RESULTS – In our lab, this style of blanket held the parts of a necked-down grade 8 bolt, which shattered in a 100 ton center-hole hydraulic cylinder. The blanket sustained no visible damage when shot with a force and impact that shattered safety glasses!

PROTECT YOURSELF AND YOUR EQUIPMENT.

- Made of see-through, high-tensile, tear resistant material.
- The clear protective blankets allow you to visually monitor the job from start to finish.
- Effectively contain broken or flying parts from the most extreme pulling, pressing, pushing or stressing forces.
- Ideal for use with pullers and forcing presses.
- Unlike rigid, fixed guards, these blankets can be wrapped and strapped around a job.
- Protective blankets come in a carrying/storage pouch to reduce aging caused by prolonged exposure to light.
